

HG069 USER MANUAL

hygger aquarium aeration strip kit

Accessories included: air tube/check valve/silicone suction cup with ring/pipe clip

Air Pump is not included.

1. PRODUCT FEATURES

Ultra-High Dissolved Oxygen: Special EVA material produces more bubbles to make the tank retain abundant oxygen and more suitable for fish growth.

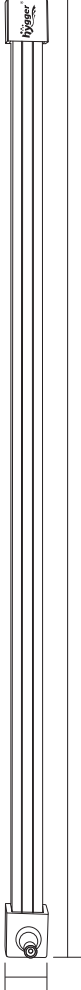

Innovative Designs Kit: Non-toxic bubble dissolve design that creates a beautiful and fantasy bubble wall, meanwhile expand the oxygen area.

Long Time Use and Easy Cleaning: Special corrosion resistant material makes longtime use and never clogs, which is different from the traditional air stone; use the cotton fabric for easy cleaning.

Two Usage Methods: immerse it at the bottom or suction it on the wall of the tank.

Suitable for freshwater ONLY. Because the base is made of aluminum alloy and saltwater cause aluminum alloy to corrode.

3. INSTRUCTIONS

- Before using, please fully immerse the aeration strip in the water , place it on the bottom or suction it on the wall of the tank.

Application 1:

Application 2:

- Please use an air pump with enough air volume (above 3W) to power the aeration strip.

Important Reminder: Please pay more attention if the aeration strip does not dissolve oxygen; try using a different air pump or a large volume air pump, as the air pump may not provide enough volume from different manufacturers. Also, try cleaning the surface of the aeration strip.

- Please avoid using the aeration strip in flammable, corrosive chemical gas or liquid.
