

HG088 User Manual

hygger saltwater light

hygger saltwater light is a good choice for aquariums, specifically designed for LPS corals and soft coral reef tanks. Please read this manual carefully before use and follow the instructions carefully.

1.PRODUCT FEATURES

Full color spectrum: Light promotes optimal coral growth and enhances vibrant coloration, and creates a gentle shimmer throughout the aquarium.

Smart fan for light temperature control: The integrated fan effectively dissipates excess heat, maintaining an optimal light temperature.

Easy assembly and disassembly: The light comes with an aluminum holder that can be easily installed by twisting the screws. It can be conveniently mounted on both rimmed or rimless tanks.

Suitable for tank thickness less than 0.95 inches: This LED aquarium light is compatible with most rimmed and rimless with a glass thickness of up to 0.95 inches.

2.PRODUCT PARAMETERS

MODEL	OUTPUT VOTAGE	POWER	LED QUANTITY	LIGHT SIZE	SUITABLE TANK SIZE	POWER CORD
HG088	DC12V	30W	36 PCS	3.27 "	18X18"	5.0ft+2.2ft

3.METHOD OF APPLICATION

(1) Remove the light and power adapter from the packaging.

(2) Connect the extension cable for the light and the extension cable for the power adapter

(3) Loosen the knob of the light and install it securely in the fish tank.

(4) Finally, plug in and select the desired light settings. The light offers five levels of brightness adjustment, respectively are: 100% --77% --55% --32% --10%, cycling from the darkest to the brightest. It also provides three color options: blue, white, and yellow. Additionally, you can set the duration of the light with three-time settings: 6H, 9H, and 12H.

(5) DIY mode setting: ⌚ Press the “color setting” button to set the desired color. After the color is set, then press the “brightness” button ± to adjust the brightness. Finally, press the “time” button ⌚ to set the desired time. The light will light up according to the color, brightness and time what you set.

Attention: When you press the “6H”, the light is yellow, and “9H” is green, “12H” is red.

6H timing: The yellow light on the controller indicates that the 6-hour timing mode is on, and the cycle is 24 hours. The light will automatically turn off after working for 6 hours in accordance with the set color and brightness, and then turn on after 18 hours in accordance with the original set mode.

9H timing: The green light on the controller indicates that the 9-hour timing mode is turned on, and the 24-hour cycle is carried out. The lamp will automatically turn off the lamp after working for 9 hours in accordance with the set color and brightness, and then turn on the lamp after 15 hours in accordance with the original set mode.

12H timing: The red light on the controller indicates that the 24-hour timing mode is on, and the 24-hour cycle is carried out. The lamp will automatically turn off the lamp after working for 12 hours in accordance with the set color and brightness, and turn on the lamp after 12 hours in accordance with the original set mode.

4. PRODUCT DETAILS

5. WARNING: To avoid possible electrical shock, do not immerse the switch in water. If the switch falls into the water or otherwise becomes wet, do not touch it until you have unplugged it. Basic safety precautions

should be observed including the following:

1. Read and follow this user manual strictly.
2. **DANGER-**To avoid possible electric shock, special care should be taken. For each of the following situations, do not attempt to repair yourself; return the light to an authorized service facility for service or discard the light.
 - A. Carefully examine the light after installation. It should not be plugged in if there is water on parts not intended to be wet.
 - B. Do not operate the light if it has a damaged cord or plug, if it is malfunctioning or if it is dropped or damaged in any manner. The power cord of this light cannot be replaced, if the cord is damaged, the light should be discarded.
 - C. To avoid the possibility of the light plug getting wet, position the aquarium stand and tank to one side of a wall-mounted receptacle to prevent water from dripping onto the receptacle or plug. A “drip loop” , shown in the figure below, should be arranged by the user for each cord connecting the light to the receptacle. The “drip loop” is the part of the cord below the level of the receptacle or the connector. If an extension cord is used, to prevent water from traveling along the cord and coming in contact with the receptacle. If the plug or receptacle does get wet, **DO NOT** unplug the cord. Disconnect the fuse to the circuit breaker that supplies power to the light. Then unplug and examine for the presence of water in the receptacle.

DRIP LOOP

3. Close supervision is necessary when the light is used near children.
4. To avoid injury, do not touch moving or hot parts.
5. Make sure the light is securely installed before operating it.
6. Read and observe all the important notices on the light.
7. If an extension cord is necessary, a cord with a proper rating should be used. A cord rated for less amperes or watts than the appliance rating may overheat. Care should be taken to arrange the cord so that it will not be tripped over or pulled.
8. The light is intended FOR HOUSEHOLD USE ONLY.
9. SAVE THIS USER MANUAL.

6. DISPOSAL

Do not dispose of this product as unsorted municipal waste. Collection of such waste separately for special treatment is necessary. This product has to be disposed of at an authorized place for the recycling of electrical and electronic appliances rather than being disposed of together with the domestic waste. Collecting and recycling waste is a way of saving natural resources. So, please consult with your local seller to make sure the product is disposed of in an environmentally friendly way.
